

Welcome to "TRIONEWS", year 1, number 2. The Trioliet newsletter in which we try to keep our partners and customers up to date with the latest developments within Trioliet.

## ▲ TRIOTRENDS

The latest developments from the Trioliet stable are:

### ▲ TRIOLLET WINS DOUBLE PRIZES

At the Agritechnica 2007 show in Hannover the Triotractor, and at the World Ag Expo 2008 in Tulare (USA) the Shifttronic distinguished themselves with a prestigious innovation award.

### ▲ SILVER MEDAL AWARD, AGRITECHNICA 2007

The Triotractor self-loading mixer-feeder has been distinguished by DLG (Deutsche Landwirtschaftsgesellschaft) with the award of the silver medal. With this, the Agritechnica innovation commission praises in particular the innovative design of the cutting/loading system.

The silver medal was presented on 11 November 2007 during Agritechnica 2007 by DLG president Carl-Albrecht Bartmer to Trioliet sales manager H. Kleverkamp.

### ▲ 2008 WORLD AG EXPO TOP FIVE NEW DAIRY PRODUCT AWARD FOR THE SHIFTRONIC

At the World Ag Expo 2008 in Tulare (California) the Shifttronic won the 2008 World Ag Expo Top Five New Dairy Product Award. The Shifttronic is a 3-stage power-shift reduction gearbox that can change gear under load that is used on the larger capacity mixer-feeders

Trioliet Sales organization USA. From left to right: Mark Kroese, Alan Brandmeyer, Edwin Jackman and Norb Schaaf.

### ▲ NEW TRIOLLET PRODUCT MANAGER

As of 1 April 2008, Stefan Schulte is the new product manager for Trioliet Mullos BV. He succeeds Hans Pleijte, who has since taken over the position of Manager R&D again. Stefan Schulte is 32 years old and was previously employed by Mogema and the Kors Group. As product manager he will focus on the implementation of the product

information, product training, product introduction and range strategy in support of and to improve sales.

### ▲ MACHINE OF THE MONTH: GIGANT

The Gigant is a self-loading mixer-feeder with a vertical mixer auger and a cutter or scraper board. The Gigant is available with a capacity of 5 m<sup>3</sup>, 7m<sup>3</sup> and 9m<sup>3</sup>. The robust U-shaped cutter cuts out a thick slice of silage feed in one flowing movement. A smooth silage face is the result, so that water ingress and composting are prevented.

The Gigant 500 film is available now on DVD or can be seen on the Trioliet website.

## TRADE SHOW CALENDAR

**Netherlands** NRM  
Veemarkthallen Utrecht  
27 - 28 June 2008  
[www.nrm.nl](http://www.nrm.nl)
