

WE PRESENT

Welcome to **TRIONEWS**, the new Trioliet newsletter; year 1, issue 1. In this new publication we aim to periodically inform our business associates and customers about the latest developments at Trioliet.

TRIOTRENDS

The latest developments from our Research & Development department are:

TRIOMATIC automatic feed system.

The Triomatic consists of two parts. The first part is a feed kitchen with supply belts and a cutting system.

The second part is a feed robot on a hangrail that mixes and doses the feed. Since October 2006, the first Triomatic automatic feed system has been in operation at Mts. Petter in Ommen. After a year's experience with the Triomatic, Henry Petter declares himself to be very satisfied. "Previously we milked 120 cows. Now the number is 200, but thanks to the Triomatic we have less work!"

TRIOTRAC self-driving feed mixing trailer with cutting/loading system.

The machine is available in sizes of 17m³, 20 m³ and 24m³. The cutting/loading system has the following advantages:

- it maintains feed structure during loading
- has lower power requirements (fuel

consumption) than usual systems (lathes)

- a very high loading capacity and high loading accuracy

ROBERT LIET
New Trioliet CEO

Robert Liet, one of the sons of Cees Liet (fellow founder of Trioliet Mullos), has become the new CEO of Trioliet Mullos BV as of 1 June 2007.

He succeeds Nico van der Plas, who headed the company for more than 23 years. Until 31 May 2007, Robert Liet was general manager of Darley B.V., a successful producer of plate processing machines based in Eijsden (in the south of the Netherlands) which is also owned by the Liet family. He retains his seat on the Management Board of Darley B.V.

QUALITY shows through!

Dik Maat was the first cattle farmer in the Netherlands to buy a Trioliet self-loading feed mix trailer at the end of 1997, the Triomix 1000. "At that time there were no brochures

yet, so I basically bought it from the photo!" says Dik Maat. Now, nearly 10 years later, Dik Maat has exchanged his Triomix 1000 (10 m³) for a Triomix 1200 (12 m³).

Trioliet invents for you

AGRITECHNICA 2007 the biggest agriculture trade fair in the world

From 11 to 17 November 2007, the Agritechnica 2007 trade fair will be held on the Messegelände in Hannover.

Trioliet will be there in force. We would be very pleased to welcome you all at the Trioliet stand in Hall 6, stand number A 39.

The following machines will be on display at our stand:

- **Triotrac**
- **Triomatic**
- **Solomix 2-2000 ZKT**
- **Solomix 2-1800 VL**
- **Solomix P1-1200 ZK**
- **Solomix 1-1000 Stat (Biogas)**
- **Triomix 1-1000**
- **Gigant 700 M**
- **Triomaster S 200**
- **Masterbuster R+L and TU 170**

TRIOTRAC Silver medal for Triotrac at Agritechnica 2007

The Triotrac has been awarded a silver medal by the DLG (Deutsche Landwirtschaftsgesellschaft)

In bestowing this award, the Agritechnica innovation committee has primarily recognised the innovative concept of the cutting/loading system. The medals will be officially presented on 12 November at the Agritechnica trade fair in Hannover. Trioliet was delighted to be honoured in this way.

THE TRIOLIET MACHINE OF THE MONTH

The Solomix P is a feed mix trailer with 1 or 2 vertical mixing screws with a mechanically driven straw blower at the front of the machine.

Besides mixing and dosing, this machine can also cut straw and blow the cut straw into the cowshed by means of a mechanically driven turbine.

The range of the straw blower is 15 to 18 metres. The scatter angle (max. 30° to the left and right) and scatter depth (max. 5° upwards and max 58° downwards) are electrically adjustable as standard. The great benefits of this machine are its low power consumption and the fact that you get a perfect view of what you are doing.

SOLOMIX P

In the past month, the Solomix P has been filmed in action in the Netherlands and Belgium. The recordings were made by Topa Marketingsupport under the direction of Jeroen Meijerink. The film is now available on DVD and can also be viewed on the Trioliet website.
